

Hillrom™

The Hillrom TS7000dV Surgical Table is designed to work with Integrated Table Motion for the *da Vinci Xi*® Surgical System from Intuitive Surgical.

TS7000DV SURGICAL TABLE

REDEFINING PATIENT POSITIONING IN *DA VINCI*® SURGERY

Integrated Table Motion (ITM) enables the *da Vinci Xi*® System to connect to Hillrom's TS7000dV Surgical Table so the patient can be dynamically positioned while the surgeon operates. This allows the surgical team to efficiently manage the patient and utilize gravity for optimal exposure and access to the target anatomy.

TS7000dV OR Table Package

The TS7000dV Surgical Table is the central piece of a unique package which provides components and accessories for multi-specialty *da Vinci*® surgery:

- Double Joint Head Section
- Two Parts Leg Section, Spreadable
- dV Remote Control
- dV Connection Cable

With any TS7000dV Operating Table two years of comprehensive service coverage and maintenance is included.

Dramatic Range of Motion

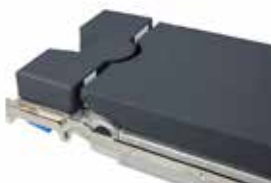

Patient Weight Capacity	450 kg (1,000 lbs)	Exceptional weight capacity in any articulation, including slide
Height Range ¹	59 - 114 cm (±1 cm) (23 - 45"(± 0.4"))	Ultra low and high platform for the surgical team, including the surgical robot
Trendelenburg / reverse Trendelenburg	± 45°	Superior positioning to expose target anatomy, including during robotic-assisted surgery

Additional Advanced Positioning Accessories

Hillrom offers an additional accessory package of specialty components that optimize patient positioning capabilities for complex robotic-assisted surgeries.

Two-Part Leg Section for midline access.

Pelvic Extension for enhanced imaging capability.

TrenGuard® for secure, steep Trendelenburg positioning.
